

SUMMER TEACHING OPPORTUNITY

FOR OUTSTANDING HIGH SCHOOL MATH, SCIENCE &
TECHNOLOGY TEACHERS
JULY 9 – AUGUST 4, 2012

Cosmos is a state funded academic enrichment program for talented students completing grades 8-12. During the 4-week experience, students take courses from university faculty while living on the UC Davis campus. Courses extend well beyond the traditional high school curriculum and are supplemented with laboratory work and field trips

Teacher Fellows Program

The Fellows program provides opportunities for outstanding high school teachers to participate in COSMOS. Each Fellow is linked with university faculty members who are teaching a course at COSMOS. During the four week program, Fellows serve as a liaison between students and university faculty by providing pedagogical guidance as needed. Fellows participate in course delivery, laboratory work, and field trips. Fellows are also responsible for conducting a "Writing and Communications" course 2x per week. They may also be called upon to provide supplemental instruction, to mentor individual students, and to supervise course projects.

APPLY NOW!

- Applications can be found at <http://cosmos.ucdavis.edu/employment.htm>
- Application deadline: **Friday, February 3, 2012**
- **\$4600 stipend**
- Lunch and on-campus parking permit provided
- Full 4 week participation is required
- Proximity to UC Davis is necessary; housing is not available for teacher fellows
